

Saugus and Malden residents will soon have a new option for accessible, quality medical care, close to home. This May will see the opening of two additional HealthPlus Urgent Care centers.

In early 2021, HealthPlus Urgent Care opened to Middleton and Wilmington residents just in time to provide needed access to COVID 19 testing during the backlog to the healthcare industry and emergence of additional COVID 19 variances.

“We are committed to the health of Boston’s North Shore communities. Our HealthPlus Urgent Care centers will serve not only our residential neighbors, but also the business community, and will offer everything from standard urgent care services, state-of-the-art diagnostic testing and screening, to flu shots, and occupational medicine.” says Dr. Majekodunmi.

“The North Shore communities have been so supportive to our efforts, by suggesting the services they believe the community needs. It was at the recommendation of the Saugus and Malden communities that we now plan on opening these additional centers in these locations.” says Dr. Malik.

Urgent care services will continue to be at the forefront of the health crisis — HealthPlus Urgent Care plans to continue to be a positive addition to the healthcare community.

Exclusive of a life — threatening emergency, visiting a HealthPlus Urgent Care location — in person, or virtually via telemedicine — not only offers quick, no-appointment access to care, but simultaneously frees up hospital emergency department beds that can be used instead for the most critically ill patients in need of immediate life-saving treatment. At HealthPlus Urgent Care we understand the complexities families face in finding healthcare solutions, and that is a problem we are here to solve.

Regionally well-known and respected co-founders Dr. Akindele Majekodunmi and Dr. Faisal Malik look forward to continuing their commitment to best-in class healthcare on Boston’s North Shore.
